# Disclaimer

- We aren't your lawyers and none of this is legal advice.
- You should consult your own attorneys for legal advice.
- Daniel represents Epic customers and developers that integrate with Epic software. He is not Epic's counsel.

# Learning Objectives

1. Get a sense of the breadth of federal and state laws that might impact developers of health apps.
2. Hear about recent trends from enforcement and litigation in the data privacy space.
3. Learn practical questions to ask when implementing compliance plans.

# Agenda

**01** Consumer Data Use and Privacy Landscape

**02** HIPAA and Data Breach

**03** Privacy Litigation Risks and Landscape

**04** Information Blocking

**05** Practical Take Home

# **Patient Data Use and Privacy Landscape**

# Patchwork Quilt of Laws

## General Health Privacy Laws

- HIPAA
- California CMIA

## State Consumer Health Privacy

- WA My Health My Data Act

## Consumer Protection Laws

- FTC Act section 5
- State unfair and deceptive practices

## Sensitive Health Information Laws

- California CMIA
- 42 CFR Part 2

## State Personal Information Privacy

- CA Consumer Privacy Act
- TX Data Privacy & Security Act

## State Reasonable Security Practices

- Mass. Gen. Law ch. 93H
- New York SHIELD Act

**Who** are the developer's customers?

**What** data is the app collecting?

**Where** is the app conducting business?

# Who's Who? The Enforcers

## **HHS Office for Civil Rights**

Enforces HIPAA and 42 CFR Part 2  
Jurisdiction over Covered Entities and BAs.

## **State Attorneys General**

Can enforce HIPAA & state consumer protection & data privacy laws.

## **Federal Trade Commission**

Enforces FTC Act (including section 5) and other federal antitrust laws.

## **Private Plaintiffs**

Can sue for statutory and actual damages (and atty fees) under some state laws.  
Some laws allow class actions.

# Federal Enforcement Trends

**OCR**

Focus on HIPAA patient right of access and security risk assessments

**FTC**

Online privacy policies, sensitive health information, information about children

# Federal Enforcement Trends

**OCR**

Focus on HIPAA patient right of access and security risk assessments

**FTC**

Online privacy policies, sensitive health information, information about children

# **HIPAA and Data Breach**

# Large Reported Breaches

Millions of Healthcare Records Breached

# Rise in Class Actions

Almost  
**1500**  
class actions  
(2024)

# **Privacy Civil Litigation**

# Privacy Class Action Litigation

## TCPA (Federal)

Requires consent for certain automated texts and calls

Statutory damages of \$500 or \$1500

## Daniel's Law (NJ)

Prohibits disclosure of home address and phone # of law enforcement and judicial officers

\$1000 for not taking down address or phone #

## Biometrics (IL)

IL BIPA regulates collection and processing biometric info, requires consent for collection

Statutory damages (\$1K or \$5K)

## Data Breach

Lots of legal theories: consumer protection law, negligence, breach of contract or fiduciary duty, etc.

Healthcare industry is big target

## Tracking/AdTech

Claims based on old laws (federal and state wiretapping laws, VPPA, state privacy laws, etc.)

Healthcare industry is big target

## Tracking/AdTech Technology

Claims based on old laws (wiretapping laws, VPPA, state privacy laws, etc.)

Healthcare industry is big target

## Civil Litigation Themes

- Embedded cookies
- Embedded “session replay” technologies
- Vendor-hosted chat bot software (including for “aiding and abetting”)
- Transmission of data in secure (e.g., PHI) portals.

## HIPAA & Cookies

- OCR’s evolving guidance

# AdTech Risk Checklist

- ☐ What tracking tech is deployed and where? (public website?)
- ☐ What type of data is being collected? (PHI? identifiable?)
- ☐ Is data being shared with third parties?
- ☐ How transparent are privacy policies & consent forms?
- ☐ Are the right agreements in place?

# **21<sup>st</sup> Century Cures Act and Information Blocking**

# Information Blocking: How We Got Here

**2015**

ONC report to Congress

**2019**

ONC proposes Cures Rule

Defines EHI, actors, and creates exception-based framework with 8 exceptions

**2021**

Information Blocking Rule takes effect

**2024**

HTI-1, 2, and 3 released. CMS Disincentive Rule takes effect

Updated exceptions including TECCA

**2016**

Congress passes Cures Act

Authorizes HHS to define "reasonable and necessary activities" and OIG penalties up to \$1M

**2020**

ONC publishes Final Cures Rule

Adds Content & Manner exception

**2023**

OIG Penalty Enforcement Begins

For developers, HIEs/HINs

**2025**

HHS priority

CMS RFI, ASTP bootcamp, OIG alert

**PIZZA**

# Scenario

- Pizza App partners with hospital so patients can order pizza from bedside and staff can order from break room and bedside
- Pizza app wants access to patient room number, demographics, allergies, and staff break room hours.
- Pizza app wants hospital IT staff to program a custom interface between its app and the hospital's instance of Epic. Hospital and app agree that app will pay actual costs plus reasonable margin

# Take Home Tips

## Data Handling

Avoid using **real patient data** in dev/test without approval and **encrypt** at rest and in transit.

## Responsibilities

Confirm if you're a **Business Associate**. Look at **flowdown** obligations. Be ready for **audit**.

## Security By Design

Apply **best consensus-based practices** like access controls, auditing and user tracking.

## Secondary Use

**De-identify** PHI before reusing data for secondary purposes when required and as practical.

## Transparency

Be transparent about **what** you collect, **why**, and **who** it's shared with in your patient/consumer-facing privacy policies.

## Information Sharing

Focus on requests for **standards-based access** methods rather than bespoke requests when feasible.
