

payer platform

Connecting providers and payers to improve care and reduce costs.

Payer Platform sets a new standard for payer-provider collaboration.

Through a bidirectional exchange of data, payers and providers can reduce costs and administrative complexity while improving how people experience healthcare.

The tools that drive this collaboration—those that support claims and prior authorizations, decision support and care management, referrals and scheduling—come to clinicians in their current Epic workflows. No faxes, portals, or extra clicks.

WHAT YOU CAN DO

Improve Clinical Outcomes and Quality Scores

Providers and care managers can review care gaps, diagnoses, and claims information from payers at the point of care and in population health workflows.

Reduce Denials

Providers can more effectively share information with payers prior to submitting claims.

Improve Authorization Turnaround Times

Real-time authorization decisions from the nation's largest payers help patients get care sooner.

Speed Up Registration with Automatic Coverage Finder

Move patients through registration quicker and avoid the downstream effects of clerical errors by automatically creating coverages provided by health plans that use Payer Platform.

Reduce Manual Effort and Promote Collaborative Care

Providers improve care coordination by automatically sending payers the HIPAA-compliant information they're required to share.

WHAT OTHERS HAVE DONE

OchsnerHealth

Worked with Humana to complete **53%** of prior authorizations for in-scope services instantly.

BAPTIST HEALTH®

27% of the chronic conditions that providers addressed were only known to them because of insights from Humana. With more accurate risk documentation, Baptist received financial reimbursement that more accurately reflected the clinical complexity of their patients, resulting in **more than \$1 million** in additional revenue.

Mayo Clinic

Worked with BCBS MN to achieve an **80%** reduction in request for clinical information denials and receive payment **22 days faster** for high-dollar claims.
